Nurse-Family Partnership (NFP) is a community health nursing program that transforms lives through improved pregnancy outcomes, promotion of child health and development, and the encouragement of economic self-sufficiency for families. NFP's life-changing impact for mothers and babies is demonstrated through long-term, rigorous scientific research. NFP partners highly trained public health nurses with first-time moms living in poverty to improve their lives and create better futures for themselves and their babies.

NFP is one of the few programs in the country with over 40 years of clinical trials. These trials prove that NFP produces long term changes in clients' lives. In Colorado, recent cumulative data shows:

- 91% of babies were born full term
- 90% of babies were born at a healthy weight
- 82% of clients were screened for depression during pregnancy
- 95% of clients initiated breastfeeding
- 62% of clients 18 years old at intake were working at program completion

Research shows that enrolling 1,000 low-income families in NFP in Colorado prevents 49 preterm births, 219 child maltreatment incidents, 407 violent crimes by youth, and 3 infant deaths.

Child First is an evidence-based, two-generation model that helps struggling families build strong, nurturing relationships that heal and protect young children from the devastating impact of trauma and chronic stress. Child First is the only psycho-therapeutic intervention in the home visiting sector qualifying for federal Maternal, Infant & Early Childhood Home Visiting funding.

As a home-based intervention model that works with the caregiver and child, Child First is delivered by a two-person team consisting of a licensed mental health clinician with experience in in early childhood development and a care coordinator who works with the entire family unit on the sources of stress that impact their family and to connect with resources. The program is unique because it combines two complementary approaches to healing from trauma and adversity: It directly decreases the stressors experienced by the family through connecting them to needed services and supports and it facilitates a nurturing, responsive parent-child relationship. Research has demonstrated that this approach protects the young developing brain and metabolic systems from the damaging effects of high stress environments such as poverty, homelessness and domestic violence.
